

Leonardo Santos

Junior React/Node Developer

👤 Profile

Frontend Developer with solid experience in React.js and Node.js, specialized in creating intuitive user interfaces and maintaining web applications. Proficient in technologies like TypeScript, Tailwind, Jest, Cypress, and state management frameworks (Redux, Zustand). Passionate about technology, aiming to deliver efficient and scalable solutions, always aligned with client needs.

📁 Employment History

React Developer at IBTI - IT Solutions, Sao Paulo

December 2021 — October 2024

Software Development for Robotic Automation

- Developed and maintained an interactive control panel for configuring and monitoring industrial robotic arms, featuring a 3D canvas for real-time rendering.
- Implemented features for remote command execution and monitoring of *targets* and *roadmaps* in robotic projects.
- Utilized technologies such as React.js, TypeScript, Zustand, Jest, and Cypress, integrating an intermediary server with Node.js in a Linux environment.
- Collaborated with international teams in English and used tools like GitLab and Jira for version control and agile project management.

IT Assistant at Flow Reembolsos, Sao Paulo

July 2021 — December 2021

Creation and maintenance of automations in a CRM software.

🎓 Education

Associate Degree, Sao Paulo College of Informatics and Administration (FIAP), Sao Paulo

January 2019 — December 2020

Graduated in Systems Analysis and Development from FIAP, with a focus on software development and innovative technological solutions.
